

Pet Dental Health By the numbers

1

80 percent

of dogs show signs of oral disease by the age of three. 70 percent of cats show signs by three.*

2

52 percent

of pet insurance claims are related to dental issues.*

3

95 percent

of dogs and cats will have dental disease requiring medical correction in their lifetime. +

4

One third

of dog owners have avoided cuddle time with their dog due to their pet's bad breath.^

5

As the severity of dental disease increases so does the chance of other issues such as heart or kidney disease.

6

The key to managing gum disease and oral health is prevention. Regularly clean your pet's teeth and take them for annual vet visits.

February is National Pet Dental Health Month. Contact your veterinarian to schedule a routine dental cleaning or exam.
